Toms Joaquin Ruiz

Buenos Aires, Argentina • [Linkedin](#) • truiz050904@gmail.com • [Portfolio](#)

Software Engineer and AI Trainer with a track record of shipping real-world systems and measurable impact. Led the design and development of an ANCAP process platform using PHP, Symfony, and SQL, cutting processing time by 30%. Currently at Outlier AI, I improve model quality using Python, JavaScript, and SQL through rigorous evaluation, data curation, and tooling. I thrive in fast-moving teams, learn quickly, and turn complex problems into simple, reliable solutions.

PROFESSIONAL EXPERIENCE

Outlier AI   **Remote, USA,**
QA Analyst - Latam Coder   *March 2024 – Present*

- Uphold rigorous quality and precision across training tasks and code, building robust, trustworthy AI. Daily toolkit includes JavaScript, TypeScript, Python, and SQL.
- Apply strict evaluation frameworks to verify response accuracy and relevance, improving overall user experience.
- Incorporate structured human feedback into iterative tuning to deepen models' contextual understanding.
- Employ advanced language-modeling strategies and collaborate with industry leaders to optimize performance.

Ferraro Camacho   **Buenos Aires, Argentina**
Desarrollador FullStack   *April 2023 – March 2024*

- Developed a comprehensive system for ANCAP, a leading oil company in Uruguay, using PHP,
- JavaScript, jQuery, Bootstrap, Twig, and Symfony.
- Optimized code, reducing data processing time by 30% and significantly boosting operational
- efficiency.
- Collaborated with cross-functional teams to integrate systems and enhance software architecture.

EDUCACIÓN

National Technological University, Argentina (UTN)   **Buenos Aires, Argentina**
Technical Degree in Programming   *April 2023*

SKILLS

- Programming Languages: React, TypeScript, JavaScript, Astro, TailwindCSS, Node.js, PHP, Symfony, SQL, MySQL, Firebase, Python, jQuery, Bootstrap, Twig, HTML, CSS, Three.js, Git.
- Languages: English, Spanish.
